Cervical Spine Anatomy and Neck Pain - Spine-Health Neck anatomy is a well-engineered structure of bones, nerves, muscles, ligaments and tendons. The cervical spine (neck) is delicate—housing the spinal cord that sends messages from the brain to control all aspects of the body—while also remarkably strong and flexible, allowing movement in all directions. Cervical Spondylosis: Causes, Symptoms, Home Treatments ... Cervical spondylosis is a common, typically age-related condition that affects the joints and discs in your neck. It develops from wear and tear of cartilage and bones and can cause stiffness. Cervical - definition of cervical by The Free Dictionary Sherrington, by experiments on dogs, showed that many of the usual marks of emotion were present in their behaviour even when, by severing the spinal cord in the lower cervical region, the viscera were cut off from all communication with the brain, except that existing through certain cranial nerves.

Cervical cancer - NHS Cervical cancer develops in a woman's cervix (the entrance to the womb from the vagina). It mainly affects sexually active women aged between 30 and 45. Symptoms of cervical cancer. Cancer of the cervix often has no symptoms in its early stages. Cervical Vertebrae - Spine-Health The seven cervical vertebrae in the cervical spine are typically very durable and injury resistant. At each level, the vertebrae protect their segment of the spinal cord and work with muscles, tendons, ligaments, and joints to provide a combination of support, structure, and flexibility to the neck. Cervical screening - NHS A cervical screening test (previously known as a smear test) is a method of detecting abnormal cells on the cervix. The cervix is the entrance to the womb from the vagina. The cervix is the entrance to the womb from the vagina.

Cervical cancer symptoms and signs | The Eve Appeal Cervical Cancer. Cervical cancer is cancer of the cervix (also known as the neck of the womb) which connects a woman's womb and her vagina. Cervical cancer can affect women of all ages but affects women primarily 30 - 45 years of age. It is very rare in women under 25 years of age. Cervical screening: role of the cervical screening ... This document outlines the role and responsibilities of a cervical screening provider lead (formerly called a hospital based programme co-ordinator. Cervical screening: programme overview - GOV.UK Screening is the process of identifying individuals who appear healthy but may be at increased risk of a disease or condition. The process is not perfect and in every screen there are a number of.

Cervical cancer - Wikipedia Cervical cancer is a cancer arising from the cervix. It is due to the abnormal growth of cells that have the ability to invade or spread to other parts of the body. Early on, typically no symptoms are seen. Later symptoms may include abnormal vaginal bleeding, pelvic pain, or pain during sexual intercourse.
